Sir:

Responsive to the August 1, 2002 Office Action, please amend the above-identified application as follows:

In the Claims

Amend claims 9 and 19 to read as follows:

9. (Amended) A method for producing a foam body part having at least one adhesive closing part with adhering elements, comprising the steps of:

arranging an adhesive closing part in a foaming mold for forming a foamed body part;

protecting adhering elements on the adhesive closing part against penetration of foam by arranging a foam-inhibiting covering on a side of the adhesive closing part opposite the adhering elements, the foam-inhibiting covering having a predetermined border width overlapping and extending beyond a surface area of the adhering elements; and
